One hoodie. Multiple identities.

Full creative review + revised $450 Meta plan

Prepared 30 October 2026. Website ordering is fully operational, as confirmed by the owner. The proposal covers website purchases, WhatsApp conversations that become orders, and Instagram follower growth.

Reviewed	Scope
51 video exports	Full-duration visual sampling: 1,332 frames across 82 fresh chronological sheets; about 11 minutes of encoded material.
11 artworks + 18 posters	Every canonical Stimpie and poster inspected individually, alongside the identity guide and product concept.
3 spoken scripts + 1 reference reel	Scripts assessed as text. Public SwapWear reel inspected visually as a filming reference. Finished non-motion clips and a second reference link were not supplied.

My understanding

Stimpy is a modular streetwear system. The stable, clean hoodie is the base; zipped artwork panels let its wearer change expression without replacing the garment. Art variety supports the promise, while the split-S, coral identity and zip signature make the different moods recognizably Stimpy.

Recommendation

Keep the brand. Lead with a real, immediate swap. Add an explicit pack offer and a single destination-specific action. Use motion to amplify the transformation and world of each design. Replace launch placeholders, inaccurate specifications and unsupported customization promises before paid use.

Starting budget: $240 website Sales + $150 WhatsApp + $60 Instagram profile growth = $450. Daily planning equivalents: $8 + $5 + $2 over 30 days.

This replaces the earlier generic split. It deliberately tests all three requested goals with an operational website and a fuller creative pool. It is a spending plan, not a sales or follower forecast.

What the concept and branding communicate

A clear system, with an explanation task

A viewer must see that the **same physical hoodie** loses one back panel and accepts another. Rapid artwork changes alone can resemble a normal range of printed hoodies. A real hand, visible zipper and uninterrupted removal/replacement resolve that ambiguity. Follow the demonstration with the emotional benefit: different moods, outfits and identities.

Layer	What it contributes	How to use it
Hoodie	Stable base; fit, weight and everyday wearability	Show a person wearing it, including the plain option. Demonstrate actual fit and construction.
Stimpies	Expressive change and collecting	Show two contrasting panels first, then the range. Clearly distinguish available choice from included quantity.
Split-S identity	Fixed + changing halves repeat the product idea	Use the official logo treatment as a stable sign-off.
Coral / black / white + Poppins	Recognition and a consistent frame around varied art	Keep these on offer cards, brand explanations and CTAs. Artwork feature posts can have their own color worlds.
Zip transition / sound	A repeatable product-linked cue	Use it briefly around the actual transformation. Do not delay the first product demonstration for a long ident.

Language: evolve the older guide for the actual content

The written guide says English-only. The three supplied scripts introduce Lebanese spoken explanation. I recommend **Lebanese speech for human explanation, with English brand lines, design names and a consistent visual identity**. Caption the spoken meaning. This is a proposed evolution of the guide, not a reason to reject the owner's footage. Test one concise Lebanese explanation against a visually self-explanatory edit; do not divide the budget into many language audiences.

Positioning and the reference reel

The supplied SwapWear reel visibly uses a real jacket and hands changing zipped panels on a tabletop. It demonstrates that a simple physical action can explain this category without a long introduction. Similar mechanisms already exist; Stimpy should establish its particular fit, artwork, finish, buying experience and Lebanon service rather than claim the mechanism is globally unprecedented.

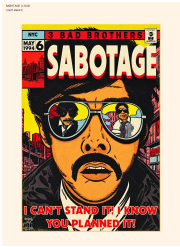

Reference: SwapWear public reel supplied by the owner. Visual observations include its immediate hand/zip opening, an attached illustrated panel, and a return to the plain garment. Music and full-speed audiovisual quality were not assessed.

Claims and the live store

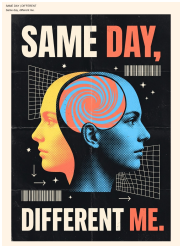

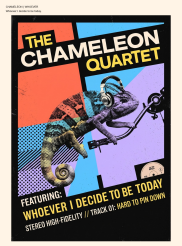

The website is an available sales path. Older repository notes about deployment or an unset number do not override the owner's current confirmation. Prices, availability, delivery promises and attachment details burned into ad exports should match the live product. A functioning checkout and a verified Meta Purchase event are separate checks.

The eleven Stimpies / 1

These are visual test hypotheses, not bestseller predictions. The deliberate mix of illustration styles supports multiple identities; the stable garment and brand frame give the range coherence.

Artwork	Visual assessment and proposed role
	**SABOTAGE / LOUD** Retro yellow/red/black face with bold title. A strong large shape and mood; smaller lines require a close-up. **Use:** Pair with BUBBLEGUM to make a loud-to-soft transformation obvious. **Check:** Lower slogan is cut in the garment mockup.
	**BUBBLEGUM / SOFT** Pink manga portrait and bubblegum. Simple face, clear silhouette and little explanatory text. **Use:** A clear second state opposite SABOTAGE or IREZUMI. **Check:** Preserve the physical panel edge/background treatment.
	**IREZUMI / FIERCE** Orange waving cat, tiger tattoo and flowers. Recognizable character with richer detail on inspection. **Use:** Contrast with BUBBLEGUM; use a second detail shot. **Check:** Tattoo detail will be lost in a tiny full-body thumbnail.
	**ZERO DUCKS / CHILL** Warm cafe scene with a sunglasses-wearing duck and humor line. **Use:** Pair with UNHINGED / WILD for personality content. **Check:** Show a tighter panel view for the character and joke.
	**B-SIDE / UNFILTERED** Purple/blue cassette imagery and public/private persona labels. **Use:** Identity metaphor; later pair with VHS for analogue nostalgia. **Check:** Tape labels need enough reading size/time.
	**RECEIPT / OFFLINE** Cobalt field and a humorous receipt. Strong shape, text-led reward. **Use:** Humor/selection carousel or pairing with UNHINGED. **Check:** Hold a readable close-up; do not rely on tiny garment text.

The eleven Stimpies / 2

Artwork	Visual assessment and proposed role
	**VHS / DRAMA** Dense vintage video packaging, car/sunset, labels and stickers. **Use:** A slower selection slide; pair with B-SIDE. **Check:** The lower fee sticker is cropped in the mockup.
	**UNHINGED / WILD** Cream rubber-hose flower, flames, bold curved headline. **Use:** Strong central mascot; pair with ZERO DUCKS or RECEIPT. **Check:** Lower ribbon is cropped in the garment mockup.
	**SAME DAY / DIFFERENT** Opposing profiles, halftone, spiral and same-day/different-me language. **Use:** Most direct conceptual fit for an overview hero. **Check:** DIFFERENT ME disappears in the garment crop.
	**CHAMELEON / WHOEVER** Colorful animal/music collage with identity copy. **Use:** Personality carousel; contrast with a simpler portrait design. **Check:** Lower identity copy is clipped in the garment mockup.
	**NEON / UNLEASHED** High-energy anime figure and cyan/white/red light on black. **Use:** A distinct high-energy mood; pair with RECEIPT / OFFLINE. **Check:** Narrower source aspect ratio needs approved product-faithful framing.

Framing QA: sources vary in aspect ratio. A universal cover crop removes meaningful artwork text in several digital garment previews. Approve a faithful fit/crop against the manufactured panel for each design. This is a digital representation issue; it does not establish a physical production defect.

The current internal specification records a 30 x 40 cm finished panel. Actual size/fit and durability claims should come from the finished product, not rendered garments or estimated development measurements.

All eighteen posters

Poster	Assessment
01 One Hoodie	Strong coral system overview. State pack contents so eleven choices do not imply eleven included panels.
02 SABOTAGE / LOUD	Readable mood and color. Tighten artwork detail; check cropped lower slogan.
03 BUBBLEGUM / SOFT	One of the simplest thumbnail compositions; good paired transformation state.
04 IREZUMI / FIERCE	Clear character silhouette; use a close-up for tattoo detail.
05 ZERO DUCKS / CHILL	Warm humor-led selection slide; enlarge the character/joke.
06 B-SIDE / UNFILTERED	Strong dark hierarchy and hoodie outline; labels need a closer second view.
07 RECEIPT / OFFLINE	Bold blue/receipt shape; give text time and separate purchase CTA from artwork.
08 VHS / DRAMA	Detailed catalogue material; preserve lower artwork and avoid tiny-message reliance.
09 UNHINGED / WILD	Readable mascot; check trimmed bottom ribbon against approved production art.
10 SAME DAY / DIFFERENT	Strong proposition hero; preserve the full phrase in an accurate detail view.
11 CHAMELEON / WHOEVER	Lively identity selection; lower artwork copy needs faithful framing.
12 NEON / UNLEASHED	Distinct high-energy selection; does not explain the mechanism by itself.
13 Which One Are You	Useful organic range/poll. A two- or three-choice paid version will be easier to inspect.
14 The Split	One of the clearest static system explainers. Add offer and one destination CTA.
15 Not Yet	Good future-drop intrigue; replace withholding message for current-order promotion.
16 The Swap	Best simple instructional static: ZIP OFF / ZIP ON / UNZIP / SWAP / ZIP. Add actual offer.
17 All Week	Explains collecting and styling; avoid implying seven panels are included.
18 Drop 001	Strong launch mood; replace COMING SOON when promoting available products.

The finished motion films

Film	What is actually visible	Paid-use recommendation
The Reveal / 14.5s	0-5s shows an illustrated panel removal and replacement. 6-8s states the proposition. About 10.5-14.5s ends on 14.11 / Set a reminder.	Strong short mechanism explainer. Keep the action; replace the placeholder ending with current pack/price and Shop now or WhatsApp.
Split Screen / 15s	About 0-3s holds the plain figure; 3-10s cycles designs/splits; 10-14s says Same hoodie / Different you.	Start closer to the first change. Add "interchangeable zipped backs" and a destination-specific ending. Good profile-growth base.
The Question / 15s	Question appears early, a pile builds through about 8.5s; one hoodie changes designs around 9.5-12.5s, followed by logo.	Strong problem/idea angle but late proof. Shorten buildup and insert actual swap early. A second creative hypothesis, not the only explanation.
Logo Reveal / 10s	Dark zip opening about 0-2s; patterned logo at 4-6s; tagline then Coming soon.	Use as a short brand signature or organic intro after updating availability. Not the main order ad.
Glimpses / 5 x 10s	SABOTAGE, BUBBLEGUM, RECEIPT, IREZUMI, SAME DAY remain mostly concealed; a larger fragment appears about 8.5-9s; Not yet ends each.	Useful future-drop/organic teasers. Current-order ads need an early full product and an available-now ending.
Which Back polls / 3 x 10s	Loud/Soft, Wild/Chill, Unleashed/Offline; labels appear around 3s, question around 6s, mostly dark silhouettes.	Organic choice content. Paid growth version: show artwork and question immediately, then an explicit follow benefit.
Which Back results / 3 x 8s	Animated results settle at 64/36, 41/59 and 58/42; You chose / Revealed first.	Templates. Publish percentages only when replaced/confirmed against actual votes. No verified audience preference follows from these renders.

Brand consistency

The short films largely use the documented Poppins, zip transition and design-color system. The Logo Reveal textures the wordmark, while the guide says not to alter logo colors/effects. Keep a clean official final mark and document any intentional motion exception. Artwork may vary; the signature should remain stable.

The five longer exports

Three 49.75-second exports come from the original 3D family. Two 60-second exports come from the later Multiple Identities film. Master/Instagram versions were inspected independently; a compressed export is not automatically a different ad angle.

Export family	Observed timeline	Decision
Original master / Instagram / avatar 3 x 49.75s	0-14.5s: dark manifesto / empty slot; first artwork about 15s. 15-30s: NEON, VHS, IREZUMI, SAME DAY worlds. 34-42.5s: system and identity montage. 43-48s: date 11.11.26 / 100 HOODIES / handle.	Use selected 15-30s or 34-42.5s inserts after an immediate clear opening. Verify date/quantity. Replace illustrated snap-stud attachment with actual zipper proof.
Later master / Instagram 2 x about 60s	0-4s: immediate swaps, WHO ARE YOU TODAY. 8-16s: HOW IT WORKS blueprint. 22-40s: identity worlds. 40-48s: collection. 48-54s: custom Studio. 54-60s: Coming soon.	Best existing long-form source for short paid edits. Compress blueprint. Remove custom Studio unless actually offered. Correct/remove dimensions. End with the available offer and one action.

Concrete corrections

Panel size: the later film shows 41 x 50 cm around 10-13s. The current user-supplied finished-panel specification is 30 x 40 cm. Use verified actual product facts or omit dimensions from ads.

Customization: the Studio sequence promises personal artwork; the master plan postpones custom orders. Replace it with collection selection unless customization is now genuinely sold and fulfilled.

Attachment: the original 3D model uses snap-stud-like corner points, confirmed by its source. The current product explanation uses a zipper. Stylized flight into a slot is not evidence of a physical zip operation.

Availability and action: 11.11.26, 14.11 and Coming soon occur across assets. Dates can be intentional, but none should be treated as the current calendar without confirmation. Website operation is confirmed; purchase ads should reflect what is available now.

Technical review

All 51 relevant video exports decode successfully and have audio. They are vertical 1080 x 1920. Original long films are 30 fps; the later long film and short motion films are 60 fps. Some masters are very large; the later master is about 1.15 GB versus about 60 MB for its Instagram export. Use a sensible final delivery export. Audio streams/levels/silence were measured, not listened to; no subjective soundtrack, voice or synchronization verdict is claimed.

Nine shoot animatics, eighteen exports

Each concept has a clean and an annotated version; both were inspected. These are illustrations of intended shoots. Every notes version contains production instructions and should remain internal.

Concept / duration	Finding	Recommended role
Edge Zip / 10s	Macro zipper remains abstract; little garment context.	Use a brief tactile insert within an actual swap ad.
Sound First / 9.2s	About 2.4s near-black opening with small SOUND ON.	Rework for a silent first impression. Begin on visible product action.
Empty Frame / 10s	More garment context; useful setup for explaining the removable area.	Supporting mechanism sequence after an immediate before/after.
Perfect Loop / 8s	Panel lift around 3.5s gives the clearest mechanical clue of this group; closely matching start/end framing.	Best physical-shoot brief to adapt for sales. Show the real removal sooner.
Shy Back / 10.4s	Withholds the back and ends Soon.	Organic future-drop intrigue; add a reveal to use for acquisition.
Always Blocked / 10s	Repeated obstruction creates a visual joke but hides the reason to buy.	Organic/personality; reveal and explain in an ad cut.
Colour Leak Walk / 10.6s	Interesting moving color/mood opening.	A short intro followed promptly by a real swap and clear offer.
Out of Frame / 10s	Deliberate missing-back framing withholds the differentiator.	Future-drop/organic material rather than a main order ad.
Censored / 10.4s	Attention through concealment; current ending says Soon.	A secondary creative after a product reveal and current action.

Countdowns and end cards

All seven countdown exports were checked: D5, D4, D3, D2, D1, Tomorrow and Launch. The countdown system is consistent and useful for a real future release. The Launch film ends Live now / Tap the link, so it can support an actual launch Story with the correct destination. Use date-relative material only at its truthful moment.

All six 3.2-second end cards were checked. Black/coral/white logo variants are reusable brand closers, but need an action for acquisition. The date card shows 14.11. Soon and Something goes here / Soon are pre-launch placeholders, not order-ready endings.

The three Lebanese scripts and the reference

Supplied script	Assessment	Recommended adaptation
1 / One hoodie, several styles	Clearest direct product explanation. The opening question is relevant, the zipper mechanism is explicit, and the identity line connects to the brand.	First paid human-led test. Show the physical removal while the hook is spoken. Trim the imagine/new idea/repeated explanation, then show replacement, fit and offer.
2 / Founder and choosing your vibe	Gives purpose/personality but delays the product mechanism behind several abstract questions and founder setup.	Keep a fuller founder version for the profile. For paid, move the demonstration/product sentence before the manifesto; make a concise version only after the first direct test.
3 / Quality, comfort and fit	Answers why the garment should be desirable beyond the panel. Useful reassurance and plain-hoodie option.	Use real fabric, seam/zip and on-body fit evidence. Generic quality adjectives alone add little. Supporting/pinned content initially, then a quality-led ad test.

A proposed 20-25 second direct-demo cut

Time	Picture	Message / purpose
0-2s	Hands are already removing the actual panel.	Ask the supplied one-style question while the viewer sees the answer.
2-7s	Attach a visibly contrasting Stimpie; same garment remains in frame.	Explain simply: change the back design with the zipper.
7-12s	Person wearing first look, then second; include a plain view if useful.	Zip off. Zip on. New style. One hoodie. Multiple identities.
12-18s	Hoodie + exactly two chosen panels; close-ups.	State the confirmed pack contents and price; delivery terms are separate.
18-25s	Clean product/brand closing frame.	Website cut: Shop now. WhatsApp cut: message to choose your size and two designs. One action per version.

These are proposed edit lengths, not measured durations of supplied finished footage. The owner supplied text for three videos and one link, rather than all five non-motion video files. Delivery, framing, acting, audio and physical-product proof in those finished clips remain unreviewed.

The first paid creative set

Use a small number of different persuasion ideas. Eleven designs, multiple encodes and many teaser variants do not require eleven audiences or dozens of live ads.

Creative	Build from reviewed material	Destination / action
A / Real Swap	Script 1 plus physical footage inspired by the tabletop clarity of the reference. Test SABOTAGE > BUBBLEGUM or IREZUMI > BUBBLEGUM. Use a short motion payoff after the proof.	Sales: main pack/product page, Shop now. Make a separate WhatsApp ending.
B / Pick Your Two	Adapt The Swap poster (16) and selected artwork close-ups into a short carousel. One hoodie and two panels are explicit. Use SAME DAY as an overview hero if helpful.	WhatsApp: ask for size and preferred two designs. Price before the click qualifies the enquiry.
C / Same Hoodie, Different Mood	Trim Split Screen or the later film's opening into a short identity change. Show the artwork immediately. WILD / CHILL or LOUD / SOFT makes the choice easy.	Instagram profile: see the designs; follow for styling and genuine future releases.
D / Quality and Fit	Script 3 with actual texture, worn fit and attachment detail. Existing footage can supply this if it really contains those shots.	Initial organic/pinned trust content; introduce as the next Sales challenger after a useful baseline.

Offer copy

Same hoodie. Different you.
One hoodie + two interchangeable Stimpies.
$45 + delivery. Pick your two.

The current project plan makes the $45 two-panel pack the main offer and the $35 one-panel pack the entry option. These are documented prices, not a live-price inspection. Match the final ad to the operational store before publishing. Avoid an introductory discount that consumes the available margin without a reason.

Prepare the new profile before paid visits

Pin: (1) real how-it-works demonstration; (2) pack contents/prices and ordering; (3) fit/sizing and delivery/exchange facts. Use the existing design posts to make the range browsable. Add genuine reviews when they exist. No paid-awareness waiting period is required merely because the page is new.

Revised $450 / 30-day Meta plan

Campaign	Budget	Initial setup	Initial creative
Website orders	$240 / $8 daily	Sales > Website > Purchase. One prospecting ad set. Verify the selected event receives a valid order event.	A / Real Swap plus one clear offer/static challenger.
WhatsApp orders	$150 / $5 daily	Engagement > Messaging apps > WhatsApp > Conversations initially. Use purchase optimization only when eligible and properly measured.	B / Pick Your Two, or A with a dedicated WhatsApp ending.
Instagram audience	$60 / $2 daily	Instagram profile destination, optimizing for profile visits or the suitable profile goal exposed in this account.	C / Different Mood with a specific reason to follow.

Audience and placements

Start in Lebanon, restricted to areas you can actually serve. Use a broad young-adult starting hypothesis (18-34, all genders) around the documented core customer rather than separate art-interest ad sets. Keep language targeting unrestricted initially and let the Lebanese/English creative qualify attention. Do not infer gender preferences from a pink or anime design.

The written strategy is Instagram-led. Use Feed, Reels and Stories with appropriate 4:5 and 9:16 versions initially. Broader eligible Meta placements can be a later controlled test, judged on delivered contribution rather than cheap clicks. Profile-directed ads use their eligible placements. Avoid spending this budget on a separate reach campaign or a tiny retargeting ad set at launch.

A practical month

Period	Action
Before paid day 1	Correct the audited claims/endings/crops; publish the core profile content; verify destination links, current offer and Meta event setup.
Days 1-10/14	Run the lean baseline: two Sales ads, one WhatsApp ad and one profile-growth ad. Check delivery/links/measurement promptly, while allowing time for COD orders to mature.
Mid-month review	Compare matched date cohorts and delivered contribution per ad dollar. Review chats, order confirmations, delivery failures and website drop-off. A few orders are directional evidence, not a conclusive winner.
Remaining days	If one route clearly produces better economics and operations can support it, move remaining unspent acquisition budget toward it within the $390 acquisition cap. Otherwise retain baseline. Add one meaningful creative challenger, not a whole new campaign tree.

The $60 growth allocation stays reserved for the follower goal unless the owner changes priorities. Daily figures are planning equivalents. This review does not create campaigns, change budgets or spend money.

Measurement, margin and decisions

What counts as success

Goal	Primary business measure	Useful diagnostic
Website sales	Delivered-order acquisition cost and contribution after variable costs/ad spend	Product views, checkout starts, submitted orders, confirmation and delivery rates
WhatsApp	Delivered orders and contribution originating from chats	Cost per conversation, qualified-chat rate, reply speed, chat > confirmed > delivered
Followers	Attributed follows where available, plus profile-to-follow behavior	Profile visits and net follower growth; total account growth also includes organic influence

Give each ad a distinct campaign/ad identifier and preserve it into the order/CRM where possible. Record WhatsApp order origin through the available ad referral or a source prompt and the manual order record. Deduplicate by order/customer lineage: a website visitor who later orders through WhatsApp is one customer/order, not two sales.

Economics from the documented offer

Offer	Price	Product cost	Before other costs and ads
Hoodie + 1 Stimpie	$35	$17	$18
Hoodie + 2 Stimpies	$45	$23	$22

Allowable delivered CPA = pre-ad contribution per delivered order - desired contribution after ads. Include seller-borne packaging/delivery, failed COD deliveries, returns and incremental handling costs. Customer-paid shipping is not automatically merchant profit or a subsidy.

Illustration only: $45 - $23 product cost - $5 other seller-borne variable costs - $7 desired contribution = **$10 allowable CPA**. That corresponds to 4.5x product-revenue ROAS. A 2x product ROAS means $22.50 advertising per $45 order, exceeding the documented $22 product margin before any other cost. These are arithmetic examples, not Lebanon benchmarks or predictions.

Track the right purchase stage once

Verify Meta purchase tracking separately from website operation. If browser Pixel and server CAPI report the same action, use appropriate event deduplication. Do not count an order being placed and later delivered as two purchases. Keep placed, confirmed, paid/delivered and returned stages in the business ledger and compare ad-spend cohorts after their delivery lag.

Awareness/reach is not follower optimization. Profile visits are not guaranteed follows, and messages are not orders. At this budget, the month can identify promising creative and route economics; it may not produce enough purchases for a reliable channel or design ranking.

Video coverage register / all 51 exports

All entries below decoded successfully and were reviewed through fresh chronological samples covering the entire duration. Clean and notes exports and different encodes are separate files, not separate marketing angles. Paths are relative to the verified project root C:\Projects\motion.

#	File	Length	Assessment
01	content/second_video/stimpy/out/stimpy.mp4	60.00s 60 fps	**Best long source / edit** Immediate swap; correct size, remove unoffered custom sequence, replace end CTA.
02	content/second_video/stimpy/out/stimpy_instagram.mp4	60.01s 60 fps	**Best long source / edit** Immediate swap; correct size, remove unoffered custom sequence, replace end CTA.

30	content/stimpy-motion/out/stimpy_countdown_d3.mp4	6.00s 60 fps	**Timed organic** Only for a real forthcoming release on the correct relative day.

#	File	Length	Assessment
31	content/stimpy-motion/out/stimpy_countdown_d4.mp4	6.00s 60 fps	**Timed organic** Only for a real forthcoming release on the correct relative day.
32	content/stimpy-motion/out/stimpy_countdown_d5.mp4	6.00s 60 fps	**Timed organic** Only for a real forthcoming release on the correct relative day.
33	content/stimpy-motion/out/stimpy_countdown_launch.mp4	8.00s 60 fps	**Launch Story / edit** Live now ending; use at truthful moment with working destination.
34	content/stimpy-motion/out/stimpy_countdown_tomorrow.mp4	6.00s 60 fps	**Timed organic** Only for a real forthcoming release on the correct relative day.
35	content/stimpy-motion/out/stimpy_glimpses_bubblegum.mp4	10.00s 60 fps	**Future-drop organic** Withholds artwork; Not yet ending. Not the main current-order creative.
36	content/stimpy-motion/out/stimpy_glimpses_receipt.mp4	10.00s 60 fps	**Future-drop organic** Withholds artwork; Not yet ending. Not the main current-order creative.
37	content/stimpy-motion/out/stimpy_glimpses_sabotage.mp4	10.00s 60 fps	**Future-drop organic** Withholds artwork; Not yet ending. Not the main current-order creative.
38	content/stimpy-motion/out/stimpy_glimpses_sameday.mp4	10.00s 60 fps	**Future-drop organic** Withholds artwork; Not yet ending. Not the main current-order creative.
39	content/stimpy-motion/out/stimpy_glimpses_tiger.mp4	10.00s 60 fps	**Future-drop organic** Withholds artwork; Not yet ending. Not the main current-order creative.
40	content/stimpy-motion/out/stimpy_logo.mp4	10.00s 60 fps	**Organic / brand closer** Shorten ident and update Coming soon for live-order use.
41	content/stimpy-motion/out/stimpy_question.mp4	15.00s 60 fps	**Second angle / edit** Compress buildup and show mechanism earlier; add offer/action.
42	content/stimpy-motion/out/stimpy_split.mp4	15.00s 60 fps	**Growth / short edit** Begin at first change; explain interchangeable back and add profile/follow action.
43	content/stimpy-motion/out/stimpy_which_poll-loud.mp4	10.00s 60 fps	**Organic / growth edit** Reveal artwork/question earlier; native poll or explicit profile action as appropriate.
44	content/stimpy-motion/out/stimpy_which_poll-unleashed.mp4	10.00s 60 fps	**Organic / growth edit** Reveal artwork/question earlier; native poll or explicit profile action as appropriate.
45	content/stimpy-motion/out/stimpy_which_poll-wild.mp4	10.00s 60 fps	**Organic / growth edit** Reveal artwork/question earlier; native poll or explicit profile action as appropriate.

#	File	Length	Assessment
46	content/stimpy-motion/out/stimpy_which_result-loud.mp4	8.00s 60 fps	**Template / actual votes** Replace/confirm percentages against genuine recorded votes.
47	content/stimpy-motion/out/stimpy_which_result-unleashed.mp4	8.00s 60 fps	**Template / actual votes** Replace/confirm percentages against genuine recorded votes.
48	content/stimpy-motion/out/stimpy_which_result-wild.mp4	8.00s 60 fps	**Template / actual votes** Replace/confirm percentages against genuine recorded votes.
49	content/stimpy-video/out/stimpy_avatar.mp4	49.75s 30 fps	**Secondary source / edit** Artwork starts about 15s; stylized snap attachment; verify date/quantity and replace CTA.
50	content/stimpy-video/out/stimpy_instagram.mp4	49.75s 30 fps	**Secondary source / edit** Artwork starts about 15s; stylized snap attachment; verify date/quantity and replace CTA.
51	content/stimpy-video/out/stimpy_master.mp4	49.75s 30 fps	**Secondary source / edit** Artwork starts about 15s; stylized snap attachment; verify date/quantity and replace CTA.

Sources, method and remaining limits

Review method and scope

Inventory: 51 relevant content video exports, 668.16 encoded seconds, 1,332 sampled frames and 82 new chronological sheets at two samples per second. All source streams were decoded end to end. Selected frames/loop edges were checked more closely where needed. All 11 canonical designs and all 18 posters were inspected individually, plus identity boards and written product/brand materials.

This is a complete inventory-level visual/creative review of the files found in the content workspace, not a claim to have examined every encoded frame, listened to every soundtrack, or measured audience response. Audio existence, levels and silence were checked technically. Brief flashes shorter than the sample interval and full-speed pacing/audio subtleties need a final human playback check of the selected delivery cuts. The completed physical videos were not supplied; the three scripts were reviewed as text. One public reference reel was visually inspected; a second link was not supplied.

No Ads Manager account, live campaign history, live product prices/stock or Events Manager access was provided. Website operation is accepted from the owner. Design pairings, audience choice and budget allocations are hypotheses for testing, not measured performance rankings.
